

SOLENT

Whelk Riddles

Solent Engineering Whelk Riddle sorting tables are Ideal where space and weight is a premium yet still offering a grading area large enough for the fullest of pots.

Fabricated in Marine Grade 5083 Aluminium the Chassis features Folded returned top edges to protect you and the pot and be rigid enough to bang the pot without damage to the table.

The shoot end accommodates standard net bags to self fill the sacks whilst working.

Underside features a 150mm diameter exit to funnel undersize into a basket or tray or allows a pipe to be attached and shot straight back to sea.

The grills are cut from 8mm 316 stainless steel and can be lifted out to clear or swapped for alternative grill gap sizes.
